WATER RESOURCE ALTERNATIVES: The Future of Sustainable Utility Practices

Thursday, November 4, 2004
12 noon–3:30 p.m. Eastern Standard Time

Sustainability is the ability to plan and manage water resources in such a way that we can sustain them for use by future generations. Many efforts toward water sustainability are being made in the water industry. For example, water reuse is doubling the use of water by reusing it for watering golf courses, irrigation, etc. Desalination converts salt or brackish water into a water resource that can be used to augment current dwindling freshwater supplies. Planning for future population growth and changes is an important factor influencing alternative water source choices to sustain your water supply for future generations.

You can explore the increasingly critical issue of water resource sustainability at this all-new AWWA Satellite Teleconference. You'll get insight on how to balance increased demand with shrinking resources and how to do more with less. The teleconference will also include discussion on

- long-term water supply issues and planning
- water resources and efficiency
- water reuse, including indirect potable and nonpotable reuse applications and issues
- water capacity maximization
- source selection and optimization
- desalination technology for inland and coastal uses
- regulatory issues
- overall building of systems
- sustainability and conservation

Take Advantage of These Outstanding Opportunities

- Earn valuable continuing education credits (contact your section to learn how)
- Learn how your peers are tackling this important issue
- Learn from a panel of leading experts and have your question answered live over the air. Panel lists for this teleconference include:
 - **Pam Kenel**—Project Manager, Black & Veatch Engineers
 - **David Ammerman**—Senior Associate and Water Treatment Specialist, Camp Dresser & McKee
 - **Amy Vickers**—President, Amy Vickers & Associates, Inc.
 - **Alison Adams**—Source Rotation and Environmental Protection Manager, Tampa Bay Water

Join colleagues from across North America for this informative and convenient program. Take advantage of this outstanding opportunity and register now to participate!

Get the Training You Need At a Location Close to Home

Are your company's training dollars limited? Then the AWWA Satellite Teleconference is the perfect solution to getting the valuable information and training hours you need! You'll not only be able to attend the teleconference at a reasonable cost, but you'll be able to attend at a location close to home or within a short driving distance.

Find the most current information on downlink sites, details on cost to attend, and information on how to register by visiting the Web at www.awwa.org.

- No access to the Web? Call AWWA at 800.926.7337, option 3, to have a downlink site list and registration form faxed or mailed to you. You can also call your section contact listed below.
- Interested in setting up a private downlink site? Please contact the registrar in your state or province (see below).

Please go to www.awwa.org and select Teleconferences under the Education & Training section to find the most current information for these states and provinces:

- **British Columbia**
- **Connecticut**
- **Florida**
- **Iowa**
- **Kansas**
- **Minnesota**
- **Missouri**
- **Northwest Territories**
- **Nunavut**
- **Ontario**
- **Pennsylvania**
- **Quebec**
- **South Carolina**
- **South Dakota**
- **Texas**
- **Utah**
- **West Virginia**
- **Yukon Territories**

AWWA is the authoritative resource for knowledge, information and, advocacy to improve the quality and supply of drinking water in North America and beyond. AWWA is the largest organization of water professionals in the world. AWWA advances public health, safety, and welfare by uniting the efforts of the full spectrum of the drinking water community. Through our collective strength we become better stewards of water for the greatest good of the people and the environment.
